

Figure 1 consists of 12 subplots, labeled (a) through (l), arranged in a 6x2 grid. Each subplot shows the normalized maximum value of the normalized velocity profile,  $V_{max}/V_0$ , on the y-axis, against a specific parameter on the x-axis. The parameters are: (a)  $\alpha$ , (b)  $\beta$ , (c)  $\gamma$ , (d)  $\delta$ , (e)  $\epsilon$ , (f)  $\zeta$ , (g)  $\eta$ , (h)  $\theta$ , (i)  $\phi$ , (j)  $\chi$ , (k)  $\psi$ , and (l)  $\omega$ . The left column (a-f) shows the effect of increasing the parameter from 0 to 1, while the right column (g-l) shows the effect of decreasing the parameter from 1 to 0. The plots show various trends, including linear increases, decreases, and non-linear curves.
